

# SPIDER

By Smartapps

The smarter way to integrate and sync data in Business Central

**Tired of disconnected systems and manual data transfers?**

With Spider, you keep everything in sync - automatically.

## Why Spider?

### Connect all your systems

Integrate Business Central with external platforms and keep data flowing.

### Sync master data everywhere

Update once- Spider synchronizes master data across companies and tenants.

### Control your integrations

Monitor, trace, and fix data imports and exports with full visibility.

### Customize for your needs

Add extra fields and tailor integrations without custom code.

## Key features

**Integrate** Business Central with **any system** using APIs, web services, or files.

**Sync master data** across **multiple companies** and **environments**.

**Track** and **manage** all data transfers with an **integration queue**.

**Add custom fields** to customer, vendor, or item cards.

**Support** for **S/FTP, Azure Storage, SharePoint**, and more.
